ACADEMIC DETAILS

University	Institute	Year	CPI/Percentage
B. Tech (Computer Science)	Graphic Era University, Dehradun	Oct 2021 - July 2025	8.5
I.S.E (12th Grade)	St. Thomas School, Gopiganj	2021	85.56%
I.C.S.E (10th Grade)	St. Thomas School, Gopiganj	2019	81.4%

INTERNSHIP / EXPERIENCE

• Cognizant Technology Solutions

Programmer Analyst Trainee (August 2025 – Present)

- Working in ADM AppDev (Insurance Domain) delivering Java-based solutions using **Spring Boot**, **MVC**, **REST APIs**, and **MySQL**.
- Developed and tested RESTful endpoints, DTOs, and persistence layers using **JPA/Hibernate**; wrote unit tests with **JUnit** and **Mockito**.
- Collaborated in Agile sprints, performed code reviews, and managed CI/CD pipelines via **Git** and **Jenkins**.
- Participated in requirement analysis, defect triage, and production support.

• Century Pulp and Paper

(June 2024 - August 2024)

- Developed a web application to manage colony complaints using PHP, XAMPP, HTML, CSS, JavaScript, and MySQL.
- Implemented SMTP-based email notifications to departments for faster resolution of issues.
- Imported data for 1500+ employees from Excel to MySQL, ensuring data integrity and seamless integration.

TECHNICAL SKILLS

- **Languages:** Java, SQL, Python, C, C++
- **Frameworks:** Spring Boot, MVC, REST API, JPA/Hibernate
- **Tools:** Maven, Git, Jenkins, VS Code, Eclipse
- **Databases:** MySQL
- **Testing:** JUnit, Mockito
- **Machine Learning:** TensorFlow, Keras, scikit-learn, OpenCV, NumPy, Pandas
- **Soft Skills:** Communication, Teamwork, Leadership, Problem-solving, Adaptability

MAJOR PROJECTS

• Patient Appointment Management System (PAMS)

(Tech stack: Java, Spring Boot, MVC, REST, MySQL, Maven) | Developed at Cognizant

- Designed and implemented a web-based system with Patient, Doctor, and Admin roles for healthcare appointment management.
- Built RESTful APIs for appointment booking, update, cancellation, and retrieval; adhered to MVC architecture for modular design.
- Integrated MySQL for persistence and implemented email/SMS notifications for confirmations and reminders.

- Managed build with Maven and version control using Git; documented endpoints and deployment steps.

- **Calculator Application**

(Tech stack: Java, Swing, AWT)

- Developed a GUI-based calculator supporting arithmetic, trigonometric, and logarithmic functions with an intuitive interface.
- Implemented event-driven programming for responsive user interactions and optimized exception handling for error-free calculations.
- Enhanced usability by adding scientific features and ensuring cross-platform compatibility.

- **Obstacle Avoidance Car Project**

(Tech stack: Arduino, Ultrasonic Sensors, Servo Motor)

- Designed and programmed an autonomous car using Arduino microcontroller and ultrasonic sensors for real-time obstacle detection.
- Implemented logic for dynamic navigation and servo motor control to avoid collisions.

SCHOLASTIC ACHIEVEMENT

- Class Representative: Represented my class from first year to present, recognized for leadership and dedication.
- Volunteered in **Parasports 2023** outreach program powered by **Ortho One**, representing **Team Cognizant**; assisted para-athletes and supported event coordination.
- Received an award for outstanding contribution and support to Parasports candidates.
